PALATIAL POOL SERVICES

3D Pool Scanning

Millimetre-Precise Digital Twins of Your Pool

Our 3D Pool Scanning system creates exact digital replicas of your pool using high-fidelity point cloud capture technology. Moving beyond traditional tape measures, this system delivers millimetre-precise volume calculations, perfect vinyl liner templating, and long-term structural monitoring — ensuring every service decision is based on exact data, not estimates.

Key Benefits

- Exact pool volume calculations for precise chemical dosing — no more guesswork
- Perfect vinyl liner templating exported directly to manufacturers
- Long-term structural monitoring detects settling or deformation early
- Non-invasive scanning requires zero modifications to your pool
- Digital twin stored securely for future reference and comparisons

Technical Specifications

Scanning Accuracy	Up to 0.1mm point distance
Capture Rate	30 frames per second
Tracking	Markerless visual and geometric feature tracking
Data Formats	PLY, OBJ point clouds with Poisson surface reconstruction
Storage	Encrypted vault with Draco compression

Integration	Automatic volume updates to HydroCommand and AquaCommander

Experience the Difference
