PALATIAL POOL SERVICES

AquaVision AI

Intelligent Visual Pool Diagnostics

AquaVision AI uses advanced computer vision and machine learning to analyse pool conditions from photographs. Simply capture an image, and our system identifies water clarity issues, algae presence, equipment condition, and surface damage — providing instant diagnostic reports with recommended actions, all without a site visit.

Key Benefits

- Instant pool condition assessment from a single photograph
- Identifies water clarity, algae, equipment issues, and surface damage
- Reduces unnecessary site visits with remote pre-diagnosis
- Detailed reports with recommended corrective actions
- Continuous learning improves accuracy over time

Technical Specifications

Analysis Engine	Convolutional Neural Network (CNN) with custom training
Input	Standard smartphone photographs
Detection Capabilities	Water clarity, algae, equipment condition, surface damage
Report Generation	Automated with severity classification
Integration	Gods Eye Command Centre real-time feed

Security	All images encrypted in transit and at rest
