PALATIAL POOL SERVICES
Proprietary Technology

Calendar System

Intelligent Scheduling and Route Optimisation

Our Calendar System is a comprehensive scheduling platform that links customer records, technician availability, and intelligent route optimisation into one seamless workflow. Drag-and-drop scheduling, automated customer notifications, and dynamic routing ensure your service visits are efficient, timely, and perfectly coordinated.

Key Benefits

- Drag-and-drop scheduling linked to customer records
- Intelligent route optimisation reduces travel time and fuel costs
- Automated SMS and email notifications keep clients informed
- Real-time technician availability and workload balancing
- Integration with equipment telemetry for informed service planning

At a Glance

Routing Algorithm: Travelling Salesman Problem (TSP) heuristic optimisation

Notifications: Automated SMS and email via Comms Hub

Data Integration: Pooltrackr telemetry and customer records

Interface: Drag-and-drop with desktop and mobile support

Architecture: Cloud-native microservices with high availability

Security: TLS 1.3, OAuth 2.0, role-based access control
