PALATIAL POOL SERVICES
Proprietary Technology

Comms Hub

Unified Communications Platform

Comms Hub centralises all customer communications — SMS, email, and voice calls — into a single chronological timeline. Every interaction is recorded, searchable, and accessible, ensuring nothing falls through the cracks. Automated follow-ups, templated responses, and intelligent workflow triggers keep your service experience seamless and professional.

Key Benefits

- Complete communication history in one chronological timeline
- Powerful search across all messages and call records
- Automated follow-ups ensure no customer is forgotten
- Professional templates for consistent, branded messaging
- Full compliance with Australian communications privacy requirements

At a Glance

Channels: SMS, Email, Voice (Australian Twilio infrastructure)
