PALATIAL POOL SERVICES
Proprietary Technology

Weather Intelligence

Predictive Scheduling and Weather-Adaptive Service

Weather Intelligence integrates hyper-local weather forecasting with our service operations to proactively protect your pool. By predicting the impact of storms, heatwaves, and heavy rain on your specific pool, the system automatically adjusts service schedules, pre-positions chemical treatments, and dispatches recovery teams — keeping your water perfect regardless of what the weather delivers.

Key Benefits

- Proactive service adjustments before weather events hit
- Pre-storm chemical treatment prevents algae blooms
- Automatic post-storm recovery scheduling
- Hyper-local forecasting specific to your property
- Reduced chemical waste through predictive dosing

At a Glance

Data Sources: Bureau of Meteorology, OpenWeatherMap, ESP32 ground-truth

Modelling: Precipitation dilution, thermal mass, wind/debris forecasting

Routing: Dynamic pre-storm and post-storm route optimisation

Integration: Gods Eye Command Centre, Calendar System, HydroCommand

Automation: Automated schedule adjustments and chemical directives

Validation: Ground-truth from proprietary sensor networks
